Abstract

This article reviewed employee training and development as a model for organizational performance and effectiveness. The various literatures reviewed on the topic in question showed that, training and development had positively correlated and claimed statistical significant relationship with employee performance and effectiveness and can advance organizational growth and success. In order to improve employee training and development as well as improved performance and service delivery, it is recommended that management should increase the number of employees taking part in training and development.

Keywords: Employee; Training; Development; Performance; Organizational;

Introduction

Preparing and improvement is a significant movement that expands the presentation of representative in an association and is a structure block which upgrades the development and outcome of an association. Armstrong (2009) expressed that associations could profit from preparing and improvement through winning the —heart and minds of their representatives to inspire them to relate to the association, to strive more for its benefit and to stay with the association. Preparing and improvement are the cycles of putting resources into individuals so they are prepared to perform well and are important for a general human asset the board approach that ideally will bring about individuals being spurred to perform (McDowall and Saunders 2010). The accompanying key terms are characterized for better elaboration.

Importance of training

ISSN 2319-5991 www.iierst.com

Vol. 17, Issue.2, April 2024

Associations actually must give progressing preparing and advancement programs for their laborers to keep on getting to the next level. Since the business climate and rivalry are continually developing, keeping on considering and obtaining new skills is significant.

Learning an open door, strength advancement, tending to shortcoming, helping representative execution and efficiency, adherence to quality norms, consistency at work, further developed confidence, brought down turnover rate, development and hazard acknowledgment, the superior standing of the association is a portion of the significant advantages of preparing and improvement.

METHODS OF TRAINING

Training Methods are 2 types:

1. ON THE JOB TRAINING

• Job rotation:

Work revolution: In this strategy, a representative is offered the chance to deal with different positions, each with its own arrangement of obligations, without causing any extra expense.

• Job instruction:

A representative is directed by a coach or manager who exhorts him/her on the specific

moves toward complete the work here of preparing.

• Coaching:

In each association, both functional and hypothetical improvement of workers is required.

Most associations settle on this technique for preparing. In this technique, the association relegates a mentor to

the representatives who will prepare them. He likewise gets standard input from the mentor.

2. OFF THE JOB TRAINING

• Case study:

By and large, a contextual investigation centers around an issue that an association is confronting. This

gives an opportunity to inspect the issue and figure out a useful circumstance.

This technique empowers

laborers to be more scientific and useful in their reasoning.

ISSN 2319-5991 www.ijerst.com

Vol. 17, Issue.2, April 2024

• Conference:

A conference occurs when a group of people gathers to discuss a specific topic or issue. Each employee investigates and discusses a variety of topics relevant to the subject. Furthermore, this method allows each employee to convey their individual opinion

Scope of the study

Regular training and development programs empower employees to strengthen their weakness and acquire new skills and knowledge.

This study is confined to Dalmia cement limited only.

Research objective:

- To study the training procedure at Dalmia cement Pvt, ltd.
- To evaluate the effectiveness of training and development methods through employee opinion in Dalmia cement Pvt ltd.
- To suggest the firms further to improve effectiveness of training programs.

Review Of Literature

- Ananthalakshmi Mahadevan et al. (2019 concentrated on the effect of preparing strategies on representative execution in an immediate selling association in Malaysia. Specialists guaranteed that building a skilful and learned labor force is one of the crucial exercises in an association to guarantee an elevated degree of skill with a capable group to maintain and fill in a powerful business climate. The unbiased behind this study was to inspect the effect of at work and off-the-work preparing on representative execution. The outcome showed that both at work and off-the-work preparing accomplished a standard coefficient beta worth of 0.370 and 0.546 separately with a critical worth of 0.000. In view of the beta worth perusing specialist found that off-the job preparing has a higher effect contrasted with hands on preparing on worker execution.
- Sumaiya Shafiq et al. (2017) examined the impact of preparing and improvement on worker execution in a privately owned business, Malaysia. Scientists expressed that the workers are a significant resource of the association, they play a part to play towards an association's prosperity. So dealing with their figuring out how to increment worker performance is required. The goal was to research the impact of hands on preparing, off-the-work preparing, position enhancement, and occupation pivot on representative

execution in privately owned businesses. The review reasoned that main work enhancement is the free factor that decidedly affects the reliant variable (representative execution) while the other autonomous factors are viewed as unimportant drivers in impacting representative execution.

- Ashikhube Humphrey Otuko et al. (2013) decided the impact of the preparation aspect on worker execution in Mumias sugar organization, Kenya. The review tried to figure out the impact of preparing need appraisal on representative execution, the impact of preparing content on worker execution, and the impact of preparing assessment on worker execution. The outcome demonstrates that there was a positive and tremendous impact between preparing need evaluation and worker execution. In this manner, most respondents expressed that preparing need evaluation was directed before the genuine preparation. The outcome shows that preparing content affects worker execution. This suggests that an expansion in preparing content will build the degree of representative execution. From the outcome, there meant that an expansion in preparing assessment and representative execution was decidedly and fundamentally related. This could be perceived to imply that assessment of the substance of the preparation and the techniques utilized, estimating www.ijcrt.org © 2021 IJCRT | Volume 9, Issue 5 May 2021 | ISSN: 2320-2882 IJCRT2105860 Global Diary of Imaginative Exploration Contemplations (IJCRT) www.ijcrt.org i113 execution information, expertise, and disposition against the standard could undoubtedly add to improve representative execution at work contingent upon the decision of assessment models.
- Tarun Singh (2015) expressed that preparation and advancement is the most ideal use for worker's capacities. Preparing is outfitting the representatives with the expected abilities to perform and advancement is the development of workers at each degree of the executives. This endeavor was had to concentrate on the effect of preparing and advancement programs on representatives' productivity at Bharat Weighty Electricals Ltd. (BHEL). The review uncovered that representatives are profoundly happy with BHEL. For 20 things normal mean score and rate score were processed 3.62 (65.5%). Representatives would rather not change their occupation since they pay is palatable. Seniors interface pleasantly with subordinates and the workplace is likewise great. yet, there is some requirement for execution in its preparation programs, reward framework, strategy, and other significant issues.
- Philipina Ampomah (2016) guaranteed that preparation and improvement is a critical figure further developing worker execution in associations. The motivation behind the review was to zero in on the impact of preparing and improvement on worker execution

in a confidential tertiary establishment in Ghana; a contextual investigation of Pentecost college school. The review uncovered that workers are roused through endlessly preparing and improvement bring about better execution for the Pentecost college school. Pentecost college school positively had a deeply grounded strategy to put resources into the preparation and improvement of the representatives and furthermore coordinated preparing programs every once in awhile, for their workers to refresh their insight and expertise. The review suggested that all representative's preparation and improvement ought to be energetically followed and made compulsory.

RESEARCH METHODOLOGY:

Descriptive research carried out for my study. A **sample of 110** representatives was chosen from among 1194 employees. sampling technique used is **simple random sampling**. Both primary and secondary data collected for the study. Primary Data has been collected by using Structured **Questionnaire**. Likert-scale was outlined for emotional inquiries to guarantee the dependability of the review. Representatives from various assignment had filled the questionnaire with the end goal of this review. Data has been analyzed by using **simple percentage method.**

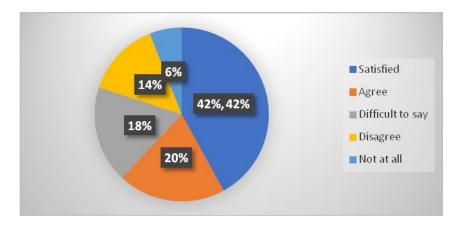

DATA ANALYSIS:

1. Training and development helps to eliminate performance deficiency in employees?

Table-1

Employees performance	Respondent	Percentage	
Satisfied	46	42%	
Agree	22	20%	
Difficult to say	20	18%	
Disagree	15	14%	
Not at all	7	6%	
Today	110	100%	

Interpretation:

Based on the data above, we can conclude that 42% of satisfied, 20% of Agree, 18% of difficult to say ,14% of disagree and 6% of not at all helps to eliminate performance deficiency in employees.

2. What do you understand by training?

Table-2

	Respondent	Percentage
Learning	41	37%
Enhancement	25	23%
Sharing information	29	26%
All the above	15	14%
Total	110	100%

Vol. 17, Issue.2, April 2024

ISSN 2319-5991 www.ijerst.com

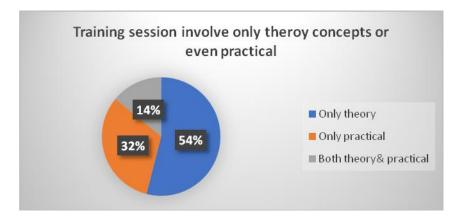

Interpretation:

Based on the data from above, we can conclude that 37% of learning, 26% of enhancement, 26% of sharing information and 14% of All the above do you understanding by training.

3. Will the training session involve only theory concepts or even practical?

Table-3

	Respondent	Percentage
Only theory	59	54%
Only practical	35	32%
Both theory& practical	16	14%
Total	110	100%

Interpretation:

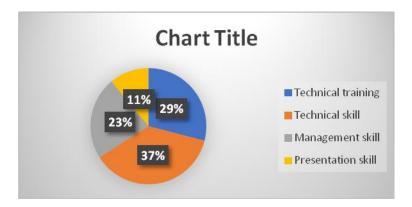

Based on the data above, we can conclude that 54% of only theory, 32% of only practical and 14% of both theory & practical training session involve only theory concepts or even practical.

4. What type of training is being imparted for new recruitments in your organization?

Table-4

	Respondent	Percentage
Technical training	32	29%
Technical skill	41	37%
Management skill	25	23%
Presentation skill	12	11%
Total	110	100%

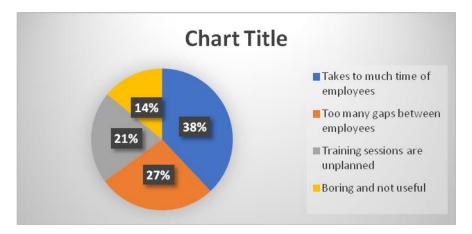

Interpretation:

Based on the data from above, we can conclude that 29% of technical training,37% of technical skill,23% of management skill and 11% of presentation skill training is being imparted for new recruitments in your organization.

5. What are the general complaints about the training session?

Table-5

	Respondent	Percentage
Takes to much time of employees	42	38%
Too many gaps between employees	30	27%
Training sessions are unplanned	23	21%
Boring and not useful	15	14%
Total	110	100%

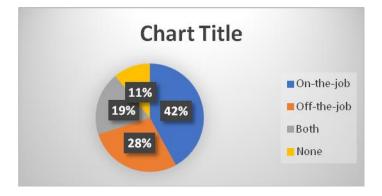

Interpretation:

Based on the data from above, we can conclude that 38% of takes to much time of employees, 27% To many gaps between employees,21% of Training session are un planned and 14% of boring and not useful in general complaints about the training session.

6. Which type of methods do you under go?

Table-6

	Respondent	Percentage
On-the-job	46	42%
Off-the-job	31	28%
Both	21	19%
None	12	11%
Total	110	100

Interpretation:

ISSN 2319-5991 www.ijerst.com

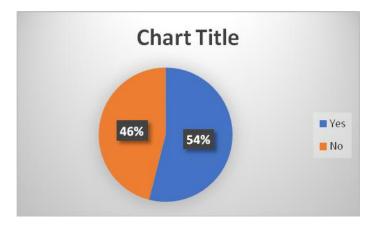

Vol. 17, Issue.2, April 2024

Based on the data from above, we can conclude that is 42% of on the job,28% of off-the job,19% of both and 11% of None are training methods.

7. Do you think training and development program increase the efficiency in employees?

Table-7

	Respondent	Percentage
Yes	59	54%
No	51	46%
Total	110	100%

Interpretation:

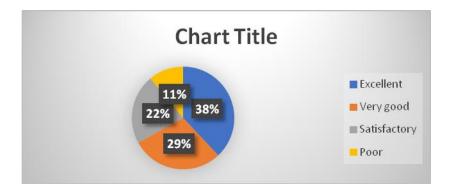

Based on the data from above, we can conclude that 54% of yes and 46% of no training and development program increase the efficiency in employees.

8. The training prepare the employees for higher level task?

Table-8

	Respondent	Percentage
Excellent	42	38%
Very good	32	29%
Satisfactory	24	22%
Poor	12	11%
Total	110	100%

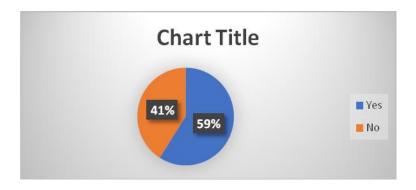

Interpretation:

Based on the data from above, we can conclude that 38% of excellent, 29% of very good, 22% of satisfied and 11% to prepare the employees for higher level task.

9. Your opinion about improvements of knowledge after training program?

Table-9

	Respondent	Percentage
Yes	65	59%
No	45	41%
Total	110	100%

Vol. 17, Issue.2, April 2024

ISSN 2319-5991 www.iierst.com

Interpretation:

Based on the data from above, we can conclude that 59% of yes and 41% of no is opinion

FINDINGS

- ➤ Majority of respondents agreed that training is given adequate importance in the organization.
- ➤ Half of respondents agreed that training is a continuous activity.
- Majority of respondents agreed that relevant topics covered in the training program.
- ➤ Half of organization agreed that in the training there is a chance to discuss with the trainers.
- ➤ Half of respondents agreed that training program is very useful to employees.
- ➤ Half of respondents agreed that training prepares employees for higher level task.
- ➤ Half of respondents agreed that training rating is satisfaction level to employees.
- ➤ Half of respondents agreed that helps to increase the morale of employees.

Suggestion

- ➤ On-the-job & off-the-job is equally important. Provide both the training continuously to the employees.
- > The present frequency of training program may be increased.
- > Trainer should be appointed to improve the effectiveness of training program.
- The management have to be supportive towards the workers.
- Experienced trainer should recruit to improve the progress of training program.

Conclusion

After conducting the study of Training and development in Dalmia cement corporation Pvt Ltd. I have arrived to the following conclusions.

- The training is the process of learning to do the job effectively & efficiently.
- Training increases the skill & knowledge of a worker.
- > Training and development programs help to eliminate performance deficiency among employees.
- > Training program was organized in a well manner in the organization.
- Relevant topics are covered in the training program.
